

Brave New World Lamp

In a brave new world imagination is free to produce a complex lamp with simple materials, translating the warm soul of the oak wood in a mechanic way. The brave new world Lamp started as a concept piece of random thought-initiated construction. Following the example of old Far Eastern bamboo scaffolding or simply of our childhood meccano creations, the Brave New World Lamp was developed without a design or plan in place. Nevertheless each piece of wood is carefully notched and pegged together to form an integral part of the overall mechanical structure.

Designer	Freshwest
Year of design	2008
Material	Solid oak frame and cast iron weights
